WORK EXPERIENCE

TRAINEE ENGINEER *FEB 2021-OCT 2021*
BOSCH CHASSIS SYSTEM INDIA PVT LTD CHAKAN,PUNE

— Manufacturing and production: I Have been involved in the production process, collaborating with manufacturing teams to ensure that products are manufactured efficiently and according to specifications.
— Project coordination: I was a part of a larger engineering team, assisting in project planning, scheduling, and coordination.
— Continuous learning and professional development: As a trainee engineer, I got opportunities to learn from experienced engineers, attend training sessions, and stay updated with the latest developments in the field.

DIPLOMA ENGINEER TRAINEE *MAY 2018- OCT 2020*
MAHINDRA RISE HINGNA,NAGPUR

— Learning and observing: As a trainee engineer, I have spend a significant amount of time learning and observing the work processes and techniques used in mechanical engineering. This involve studying engineering principles, attending training sessions
— Collaboration and teamwork: I have work with other engineers, technicians, and professionals from various disciplines. Collaboration and teamwork skills are vital for successful project execution, as I also contribute my expertise and work effectively within a team environment.
— Safety and Compliance: In mechanical engineering, adhering to safety standards and regulations is vital. I have been familiarize with safety protocols and ensure that mechanical systems meet the necessary compliance requirements. This may involve conducting risk assessments, implementing safety measures, and following established procedures.
